Solectria Renewables Announces Commercial and Utility-Scale PV Inverters Available for Ontario Feed-in-Tariff Program

Lawrence, MA – July 22, 2010 – [Solectria Renewables, LLC](#), the leading U.S. PV inverter manufacturer, announced today the availability of commercial and utility-scale inverters that are fully compliant with the domestic content requirements of Ontario’s [Feed-In-Tariff \(FIT\) program](#). Solectria Renewables is the leading inverter provider for Ontario’s Micro FIT program providing products ranging in size from 3 to 10 kW. The addition of Solectria’s commercial and utility-scale inverters provide the most comprehensive suite of FIT compliant inverters in the industry.

Through a manufacturing partnership with [SunRise Power Corporation](#), Solectria Renewables now offers commercial and utility-scale inverters ranging from 10 to 500 kW specifically adapted for the Ontario FIT program. The inverters are customized for 208, 480 and 600VAC and designed to withstand temperatures from -40 to 50°C making Solectria’s PV inverters the leading solution for the Canadian market.

“The Ontario PV market is experiencing extraordinary growth. We are proud to offer Solectria’s inverters and expect the Solectria inverter product line to become the number one choice for commercial and utility-scale projects. There has been an overwhelming demand for PV inverters over the past 6 months and we foresee demand continuously growing,” said Paul Pausé, President of SunRise Power.

“We are extremely proud of our PV inverters and excited to be helping Ontario meet their renewable energy objectives. We are well prepared for this demand and anticipate providing greater than 50MW of manufacturing capacity to the Ontario market,” said Scott Bowden, Business Development Manager for Solectria Renewables.

About Solectria Renewables, LLC

[Solectria Renewables, LLC](#) is the leading U.S. based PV inverter, string combiner and web-based monitoring company for residential, commercial and utility-scale solar projects. Our wide range of products includes 1.8kW to 500kW grid-tied inverters for systems from 1kW to multi-MW photovoltaic systems. Solectria Renewables is backed by over 20 years experience with inverters and other electronic power systems for harsh environments.

About SunRise Power Corporation

[SunRise Power Corporation](#) operates in Peterborough Ontario, Canada and is the exclusive Canadian manufacturer for Solectria Renewables grid-tied PV inverters. With over 45 years of experience in distribution and manufacturing, SunRise Power offers a variety of solar products including PV inverters, string combiners, web-based monitoring and mounting frames.
