Solectria Renewables Expands Management Team

LAWRENCE, Mass., October 1, 2008 - Solectria Renewables has added two new members to its growing management team. Scott M. Bowden joins as Business Development Manager and Brad Sherman as Sales Associate.

Scott Bowden

will oversee business development for the company's extensive line of grid-tied photovoltaic (PV) inverters and accessories. He will be responsible for establishing and managing Solectria Renewables' sustainable growth by developing the full potential of corporate marketing, sales, and information management and customer service.

"I am very pleased to be joining a company that has such great potential and a terrific product line," said Bowden. "It's not surprising that customers of Solectria Renewables remain loyal to such a focused and innovative organization. I look forward to helping it grow."

Bowden was previously Managing Director of US operations for the Swiss firm 4M Technologies. In this position he successfully boosted sales of spare parts, consumables, and after-sales service of optical disc manufacturing equipment. Bowden earned a Bachelor of Science in Industrial Technologies from Fitchburg State College and also attended Dale Carnegie Sales Training. He has more than 20 years of technology sales experience in the audio, semi-conductor, and optical disc industries.

Brad Sherman will manage Solectria Renewables' existing and growing customer base with all sales information and support.

Brad Sherman earned his Bachelor of Arts in Politics from Bates College, where he specialized in environmental politics and the science of alternative energy. His studies in Environmental Diplomacy, Climate Change and Public Policy, and Energy and the Environment included in-depth research on environmental politics and water management along the Nile River in Africa. Most recently, Brad conducted fieldwork for the Lincoln Land Conservation Trust, helping to maintain a balanced ecosystem on 80 miles of conservation trails and land. His strong dedication to promoting renewable energy and competitive ambition promises to make Brad a valuable asset to the Solectria Renewables team.

"The addition of Scott and Brad underscores our strong commitment to growing national and international presence," said James Worden, CEO of Solectria Renewables. "With a keen focus on grid-tied PV inverters and accessories, our staff's extensive industry experience and expertise has allowed us to gain a strong position in the market. Scott's acumen in sales, marketing, business development, and management will add further depth to our team and ultimately benefit our industry, partners, and customers. Brad's keen focus on individual customer requirements will assure customers of our commitment to the industry."
